INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders

YEONG GUAN ENERGY TECHNOLOGY GROUP CO., LTD.

Opinion

We have reviewed the accompanying consolidated balance sheets of Far Eastern New Century Corporation and its subsidiaries (collectively, the “Group”) as of March 31, 2024 and 2023, the related consolidated statements of comprehensive income, changes in equity and cash flows for the three months ended March 31, 2024 and 2023, and related notes to the consolidated financial statements, including a summary of significant accounting policies (collectively referred to as the consolidated financial statements). Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

Scope of Review

We conducted our reviews in accordance with the Standards on Review Engagements of the Republic of China 2410 „Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion

Qualified Conclusion

Based on our reviews, except for the adjustments, if any, as might have been determined to be necessary had the financial statements of the non-significant subsidiaries, joint operations, and associates as described in the preceding paragraph been reviewed, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not present fairly, in all material respects, the consolidated financial position of the Group as of March 31, 2024 and 2023, and its consolidated financial performance and its cash flows for the three months ended March 31, 2024 and 2023 in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and International Accounting Standard 34 “Interim Financial Reporting” endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Yeong Guan Energy Technology Group Co., Ltd. and Subsidiaries
Notes to Consolidated Financial Statements
for periods from January 1 to March 31 of 2024 and 2023
(Unless otherwise specified, all amounts are in thousands of NTD.)

1. GENERAL

Yeong Guan Energy Technology Group Co., Ltd. (hereinafter referred to as the “Company”) was established on January 22, 2008 in British Cayman Islands under the main purpose of organization restructuring. According to the Company’s equity swap agreement, organization restructuring was completed on September 22, 2008. The Company has become an investment holding company after the restructuring.

The Company’s stocks were listed and traded in Taiwan Stock Exchange starting April 27, 2012.

Consolidated financial statements hereto are presented in the Company’s functional currency of NTD.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the Board of Directors on May 9, 2024.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

A. Initial application of the amendments to the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) (collectively, “IFRSs”) endorsed and issued into effect by the Financial Supervisory Commission (FSC)

The initial application of the amendments to the IFRSs endorsed and issued into effect by the FSC did not have a significant effect on the Group’s accounting policies.

B. The IFRSs issued by International Accounting Standards Board (IASB), but not yet endorsed and issued into effect by the FSC.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

New IFRSs	Effective Date Announced by IASB
Amendments to IFRS 10 and IAS 28 “Sale or Contribution of Assets between An Investor and Its Associate or Joint Venture”	To be determined by IASB
IFRS 17 “Insurance Contracts”	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 “Initial Application of IFRS 9 and IFRS 17 -Comparative Information”	January 1, 2023
IFRS 18 “Presentation and Disclosures in Financial Statements”	January 1, 2027
Amendments to IAS 21 “Lack of Exchangeability”	January 1, 2025 (Note 2)

Note 1: Unless stated otherwise, the above New IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

Note 2: An entity shall apply those amendments for annual reporting periods beginning on or after January 1, 2025. Upon initial application of the amendments to IAS 21, the Group shall not restate the comparative information and shall recognize any effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or, if applicable, to the cumulative amount of translation differences in equity as well as affected assets or liabilities.

IFRS 18 “Presentation and Disclosures in Financial Statements”

IFRS 18 will supersede IAS 1” Presentation of Financial Statements”. The main changes comprise:

- Items of income and expenses included in the statement of profit or loss shall be classified into the operating, investing, financing, income taxes and discounted operations categories.
- The statement of profit or loss shall present totals and subtotals for operating profit or loss, profit or loss before financing and income taxes and profit or loss.
- Provides guidance to enhance the requirements of aggregation and disaggregation: The Group shall identify the assets, liabilities, equity, income, expenses and cash flows that arise from individual transactions or other events and shall classify and aggregate them into groups based on shared characteristics, so as to result in the presentation in the primary financial statements of line items that have at least one similar characteristic. The Group shall disaggregate items with dissimilar characteristics in the primary financial statements and in the notes. The Group labels items as ‘other’ only if it cannot find a more informative label.
- Disclosures on Management-defined Performance Measures (MPMs): When in public communications outside financial statements and communicating to users of financial statements management’s view of an aspect of the financial performance of the Group as a whole, the Group shall disclose related information about its MPMs in a single note to the financial statements, including the description of such

measures, calculations, reconciliations to the subtotal or total specified by IFRS Accounting Standards and the income tax and non-controlling interests effects of related reconciliation items

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continually assessing the possible impact that the application of other standards and interpretations will have on the Group's financial position and financial performance, and will disclose the relevant impact when the assessment is completed

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

(1) Statement of Compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers, and IFRSs as endorsed and issued into effect by the FSC.

(2) Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
3. Level 3 inputs are unobservable inputs for the asset or liability.

(3) Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company. Income and expenses of

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective date of acquisition up to the effective date of disposal, as appropriate.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company.

All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

See Note 12, Table 6 and Table 7 for the detailed information of subsidiaries (including the percentage of ownership and main business).

(4) Other significant accounting policies

Except for the following, please refer to the consolidated financial statements for the year ended December 31, 2023.

1. Classification of current and non-current assets and liabilities Current assets include:

(1) Assets held primarily for the purpose of trading;

(2) Assets expected to be realized within 12 months after the reporting period; and

(3) Cash and cash equivalents unless the asset is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

Current liabilities include:

- (1) Liabilities held primarily for the purpose of trading;
- (2) Liabilities due to be settled within 12 months after the reporting period; and
- (3) Liabilities for which the Group does not have the substantial right at the end of the reporting period to defer settlement for at least 12 months after the reporting period.

Assets and liabilities that are not classified as current are classified as noncurrent.

- (2) Taxation Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

5. CRITICAL ACCOUNTING JUDGEMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

The estimates and underlying assumptions are audited on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

At amortized cost

The average credit period of sales of goods was 90 days. No interest was charged on trade receivables. Credit rating information is obtained from independent rating agencies where available or, if not available, the Group uses other publicly available financial information or its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

The Group measures the loss allowance for trade receivables at an amount equal to lifetime expected credit losses. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of economic conditions at the reporting date. As the Group's historical credit loss experience does not show significantly different loss patterns for different customer segments, the provision for loss allowance based on past due status is not further distinguished according to the Group's different customer base.

The following table details the loss allowance of trade receivables based on the Group's provision matrix.

(2) Capital Surplus

The capital surplus arising from shares issued in excess of par (including share premium from the issuance of ordinary shares, treasury share transactions, consolidation excess and expired share options) and donations may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and once a year).

Capital surplus generated from equity component of convertible bonds payable may not be used for any purpose; Capital surplus generated from forfeited share options may only be used to offset a deficit.

(3) Retained earnings and dividend policy

Under the dividend policy as set forth in the amended Articles, when Company makes profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of previous years, setting aside as legal reserve 10% of the remaining profit, and then any remaining profit together with any undistributed retained earnings, distributed, shall be used by the Company's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and of bonus of shareholders. For the policies on distribution of compensation of employees and remuneration of directors and supervisors before and after amendment, refer to Note 23. compensation of employees and remuneration of directors.

Distribution of shareholder dividend and employee bonus can be distributed, pursuant to Board of Director's Meeting determination, to employees or shareholders in cash, proceeds from fully paid shares not yet issued, or both cash and aforementioned proceeds. For shareholder dividend, however, cash dividend distributed shall not be less than 10% of all dividends. The Company will not pay for interest on undistributed dividend or bonus.

Appropriation of earnings to legal reserve shall be made until the legal reserve equals the Company's paid-in capital. Legal reserve may be used to offset a deficit. If the

Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

Items referred to under Rule No. 1090150022 issued by the FSC and the directive titled "Questions and Answers for Special Reserves Appropriated Following Adoption of IFRSs" should be appropriated to or reversed from a special reserve by the Company.

The accumulated deficits off-set for 2023 had been proposed in the board of directors on March 16, 2024. The accumulated deficits off-setting and dividends per share were as follows:

	Earnings Distribution	
	2023	2022
Special Reserve	<u>\$ 190,528</u>	<u>(\$ 156,576)</u>

(4) Special Reserve

Upon the Company's first adoption of IFRSs, accumulated conversion adjustment amount transferred into retained earnings was NT\$8,214 thousand. The same amount of special reserve has already been appropriated accordingly. Upon earnings distribution, other shareholder's equity deduction as of the ending day of reporting period as well as special reserve appropriated during first adoption of IFRSs shall also be recognized. In the event that there is a subsequent reversal on other shareholder's equity reduction balance, distribution of earnings can then be conducted on the reserval portion.

If the Company offered to settle bonuses paid to employees in cash or shares, the Company assumed the entire amount of the bonus would be settled in shares and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, if the effect is dilutive. Such dilutive effect of the potential shares was included in the computation of diluted earnings per share until the shareholders resolve the number of shares to be distributed to employees at their meeting in the following year.

The Group's third outstanding domestic unsecured convertible bonds are potential common shares. However, given the counter-dilution effect from such potential common shares of 2023 Q1, they are not included in the calculation of diluted earnings per share.

26. Capital Risk Management

The Group engages itself in capital management to ensure necessary finance resources and operation plan for the purpose of meeting the needs for future 12-month operation capital, capital expenditure, debt repayment as well as dividend payment. Under the premise that respective enterprise of the Group will be able to operate continuously, shareholder's compensation will be maximized through optimization of debt and equity balances.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

The Group's major management regularly review the Group's capital structure. Contents of review include consideration of various capital costs as well as their related risks. With major management's suggestions, the Group balances its overall capital structure through dividend payment, new share issuance, new debt issuance or repayment of existing debt.

(IV) Financial risk management objectives and policies

The Group's main financial instruments include cash and cash equivalents, notes and trade receivables, trade payables, loans and lease liability. The finance department of the Group provides service to business departments, coordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyze exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Group sought to minimize the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives was governed by the Group's policies approved by the Company's board of directors, which provided written principles on foreign currency risk, interest rate risk, credit risk, the use financial derivatives and non-derivative financial instrument, and the investment of excess liquidity. Compliance with policies and exposure limits was reviewed by internal auditors on a continuous basis. The Group did not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

After completion of derivative financial instrument transaction, finance department will file report to the Board of Directors Meeting accordingly.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

1. Market Risk

The Group's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see Note (1) below) and interest rates (see Note (2) below).

There had been no change to the Group's exposure to market risks or the manner in which these risks were managed and measured.

(1) Foreign currency risk

Several subsidiaries of the Company have foreign currency denominated sales and purchases, which exposed the Group to foreign currency risk. Exchange rate exposures were managed within approved policy parameters utilizing foreign exchange forward contract.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities (including those eliminated on consolidation) and of the derivatives exposing to foreign currency risk at the end of the reporting period are set out in Note 7 and 30.

Sensitivity Analysis

The Group was mainly exposed to the currency USD and EUR.

The following table details the Group's sensitivity to a 1% increase and decrease in the functional currency against the relevant foreign currencies. 1% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis included only outstanding foreign currency denominated monetary items and foreign exchange forward contracts designated as cash flow hedges, and adjusts their translation at the end of the reporting period for a 1% change in foreign currency rates. A positive number below indicates an increase in pre-tax profit

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

and other equity associated with the functional currency strengthen 1% against the relevant foreign currencies. For a 1% weakening of the functional currency against the relevant foreign currencies, there would be an equal and opposite impact on pre-tax profit and other equity and the balances below would be negative.

	For the three months ended March 31, 2024	For the three months ended March 31, 2023
USD	\$ 4,676	\$ 6,359
ERU	6,865	(2,995)
RMB	(790)	(2,399)

Aforementioned foreign currency's influence over profit or loss mainly comes from fair value changes, on the balance sheet day, of consolidated company's outstanding USD and EUR denominated account receivables/payables without cash flow hedge as well as total amount investment hedge derivatives.

In the management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign currency risk because the exposure at the end of the reporting period did not reflect the exposure during the period.

(2) Interest Rate Risk

The Group is exposed to interest rate risk because entities in the Group borrow loans at both fixed and floating interest rates.

The carrying amount of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	<u>March 31, 2024</u>	<u>December 31, 2023</u>	<u>March 31, 2023</u>
Fair Value Risks			
-Financial Assets	\$ 1,134,782	\$ 1,249,691	\$ 1,720,178
-Financial Liabilities	3,409,714	3,371,661	4,884,168
Cash Flow Risks			
-Financial Assets	2,508,534	2,548,511	1,682,522
-Financial Liabilities	10,365,962	10,158,075	6,398,531

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

Sensitivity Analysis

The sensitivity analyses below were determined based on the Group's exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis was prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole period. A 1% increase or decrease was used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 1% higher or lower and all other variables were held constant, the Group's pre-tax profit for the years ended March 31, 2024 and 2023 would decrease or increase by (\$19,644) thousand and (\$11,790) thousand, respectively, which was mainly attributable to the Group's exposure to interest rates on its variable-rate bank loans.

(3) Other price risk

The Group was exposed to equity price risk through its investments in equity securities. Equity investments are held for strategic rather than for trading purposes, the Group does not actively trade these investments. In addition, the Group has appointed a special team to monitor the price risk and will consider hedging the risk exposure should the need arise.

Sensitivity analysis

The sensitivity analysis below was determined based on the exposure to equity price risks at the end of the period.

If equity prices had been 1% higher/lower, pre-tax/post-tax profit for the three months ended March 31, 2024 would have increased/decreased by \$1,985 and \$1,182 thousand.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

2. Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. As at the end of the reporting period, the Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure of counterparties to discharge an obligation and financial guarantees provided by the Group could arise from the carrying amount of the respective recognized financial assets as stated in the balance sheets.

To mitigate credit risk, management of consolidated company assigns a specific team responsible for credit extension amount determination, credit extension approval as well as other monitoring processes to ensure that appropriate actions have been taken to recover overdue account receivables. Additionally, consolidated company will, on balance sheet day, re-verify each account receivable recoverable amount to ensure unrecoverable account receivables have already been recognized as appropriate impairment losses. With this, the Company's management considers that consolidated company's credit risks have been reduced dramatically.

The Group transacted with a large number of customers from various industries and geographical locations. The Group continuously assesses the operations and financial positions of customers and monitors the collectability of accounts receivable.

Current capital transaction counterparties are financial institutions and company organizations with good credit ratings, and therefore their credit risks are limited. The Group transacts with a large number of unrelated customers and, thus, no concentration of credit risk was observed.

3. Liquidity Risk

The Group manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Group's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Group relies on bank loans as a significant source of liquidity. As of the Group had available unutilized short-term bank loan facilities set out in (3) below.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

(I) Liquidity and Interest Rate Risk Tables for Non-Derivative Financial Liabilities

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables had been drawn up based on the undiscounted cash flows of financial liabilities from the earliest date on which the Group can be required to pay. The tables included both interest and principal cash flows. Specifically, bank loans with a repayment on demand clause were included in the earliest time band regardless of the probability of the banks choosing to exercise their rights. The maturity dates for other non-derivative financial liabilities were based on the agreed repayment dates.

To the extent that interest flows are floating rate, the undiscounted amount was derived from the interest rate curve at the end of the reporting period.

(2) Liquidity and Interest Rate Risk Tables for Derivative Financial Liabilities

The following table details the Group's liquidity analysis of its derivative financial instruments. The table is based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed is determined by reference to the projected interest rates as illustrated by the yield curves at the end of the period.

(V) Information of Financial Asset Transfer

The Group transferred a portion of its banker's acceptance bills in mainland China to some of its suppliers in order to settle the trade payables to these suppliers. As the Group has transferred substantially all risks and rewards relating to these bills receivable, it derecognized the full carrying amount of the bills receivable and the associated trade payables. However, if the derecognized bills receivable is not paid at maturity, the suppliers have the right to request that the Group pay the unsettled balance; therefore, the Group still has continuing involvement in these bills receivable.

The maximum exposure to loss from the Group's continuing involvement in the derecognized bills receivable is equal to the face amounts of \$446,596 thousand, \$537,258 thousand and \$390,024 thousand as of March 31, 2024, December 31, 2023 and March 31, 2023, respectively. Taking into consideration the credit risk of these derecognized bills receivable, the Group estimates that the fair values of its continuing involvement are not significant.

This is the English translation. In case of discrepancies between the Chinese Text and the English translation, the Chinese text shall prevail.

During the three months ended March 31, 2023 and 2020, the Group did not recognize any gains or losses upon the transfer of the banker's acceptance bills. No gains or losses were recognized from the continuing involvement, both during the period or cumulatively.

28. Transactions With Related Party

Balances, transactions, revenue and expenses between the Group and its subsidiaries, which are related parties of the Group, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below
